The OMEGAN

VOLUME XIV NUMBER 2

MAY 1937

EDITORIAL

Two years ago when the Arch Chapter decreed that THE OMEGAN should be published but twice a year for the time being, we thought that we were putting into effect a measure which would be greeted with huzzas by our readers. In fact, if it proved successful, we proposed to make ourselves even more popular by completely suspending publication. After all, who would miss these issues? Thus we blandly reasoned. But we reckoned without the Postmaster of Harrisburg, Pennsylvania. He, dear fellow, would be satisfied with no less than four issues a year and even threatened us with the loss of our second class mailing privileges if he did not get them.

And that, dear reader, is the reason for this issue. In it you will find some chapter items which, for some reason or other, did not get into the last issue.

In the last issue we promised a sketch of our new Arch Councilor Hubert L. Steed. While we have succeeded in obtaining some vital statistics from him, it will take a little more sleuthing before we can give a presentable sketch.

Copyright, 1937, by Martin E. Jansson, *Editor*

Entered as second class matter at the post office at Harrisburg, Pa.

The OMEGAN is published four times a year on the fifteenth of March, May, October and December at Harrisburg, Pa., by authority of Theta Upsilon Omega Fraternity.

The subscription price of the OMEGAN is $2.00 a year. Single copies 50 cents. Life subscriptions $15.00.

Changes of address and other matters pertaining to circulation should be addressed to Box 688, Harrisburg, Pa., or to George W. Braun, 900 Cass Street, Illinois. Address all other matter to Martin E. Jansson, Editor, Roxboro Pl., N. W., Washington, D. C.

STEVENS INSTITUTE EXPANSION PLANS REVEALED

There is within our fraternity no more closely knit group of men than the associate members of Gamma Alpha chapter. With much in common in the way of background, professional pursuits, and geographical location, they share with other alumni of the Stevens Institute of Technology a lively and enduring interest in their alma mater. Hence, the highlight of their annual dinner on February 18 was a description in some detail by Dr. Harvey N. Davis, president of the college, of a fundamental architectural plan for the future development of the college on the thirty-acre campus at Castle Point, Hoboken. Two of the proposed buildings, dormitories given by Mr. William S. Barstow and Mr. Edgar Palmer, will be started immediately. Dr. Davis said that the approval by the trustees of the general plan for future expansion closes an often-revived debate on the possible removal of the college from its metropolitan site.

The studies made by the college and by its supervising architects, Voorhees, Gmelin & Walker, indicate, Dr. Davis said, that the present main campus of the college, occupying approximately thirty acres at Castle Point, is adequate not only for the present student body of five hundred but even for a college of nine hundred to one thousand. He said that in his opinion the present limitation to five hundred is not to be regarded as perpetual. "On the other hand," he said, "our intention is to keep the college small enough so that everybody can know everybody else at the engineering camp and around the campus, so that each student can know and be known by the more distinguished as well as the younger members of the faculty, so that we may have solidarity in our academic community, so that we may always be one 'house' and not an assemblage of 'houses'. My own opinion is that in planning for the long-range future, an undergraduate body of

something like eight hundred would be the optimum." This number, he said, should be supplemented by one hundred graduate students engaged in "fifth years" of specialization in four or five main parts of the engineering field. The tendency in engineering education, Dr. Davis said, is to emphasize the fundamental discipline of general education in the undergraduate course and to allow for specialization in a fifth year.

The trustees of the college, Dr. Davis said, have decided not to give up its present site partly because of the economic waste involved, partly because of the heritage of engineering tradition associated with Castle Point, chiefly because "it would have to be a magnificent site indeed to excel our own in beauty, in accessibility, or in potentiality." Also the metropolitan district of New York and New Jersey, even now underequipped for the training of engineers, cannot afford to lose one of the chief centers of engineering education. "In a greater New York of ten million persons, there should be," he said, "facilities for the higher technical education of seven or eight thousand young men; we have in this area today full-time enrollment of less than three thousand."

Stevens Plant to be Expanded Gradually

The plans for the architectural development of Castle Point, indicated in a relief model shown at the dinner, provide not only for a gradual expansion of the instructional plant, but also for full recreational facilities and housing for both students and faculty. The present plant, laboratories, recitation halls and the like, lies at the southerly edge of the campus. "Our new site," Dr. Davis said, "adjoins the old one, and the work of the college may continue without interruption while the new development proceeds, however gradually." The original college building at Hudson and Fifth Streets, the "Old Stone Mill" to alumni, may ultimately have to give way to other buildings, but no other structure is indicated for that site at present. The laboratory of mechanical engineering, built by Andrew Carnegie, the Morton Memorial Laboratory of Chemistry, the "Navy" building, headquarters of the steam engineering school of war times and now housing two departments of instruction and the Experimental Towing Tank Laboratory, have a permanent place in the picture of the college. The projected buildings for laboratory and instructional purposes, offices of the administration and power plant are to extend northward from the end of Sixth Street, facing the river and rising abruptly from the River Road. It is probable, Dr. Davis said, that one of the first buildings to be erected will be a physics laboratory, adjacent to the Morton Laboratory and forming with

it a science group with adequate facilities for research in both branches. The campus plans shown by Dr. Davis are drawn on the assumption that a field house, an enclosed playing field, is to be provided and that it may be necessary in the future to replace the present gymnasium by another building facing westward to the main athletic field. In that event, the present Walker Gymnasium could be remodelled to serve as the auditorium and theatre.

First Construction to be Two Dormitories

The "new Stevens," Dr. Davis said, "will be begun with the erection of two dormitory units during 1937, each at a cost of $150,000. The funds for these buildings, given by Mr. William S. Barstow, a pioneer in the development of public utilities, and by Mr. Edgar Palmer, Chairman of the Board of the New Jersey Zinc Company, were placed in the hands of the Trustees of the College some time ago. The general plan for the development of the College had then to be developed, Dr. Davis said, so that it might be made certain that the new buildings will fit into a properly articulated general design.

The undergraduates, Dr. Davis said, have repeatedly pointed out the need for modern, fireproof student residences. An independent study made by the student newspaper showed that the commuting group, roughly two-thirds of the student body, spends on the average of an hour and twenty minutes per day travelling to and from the college. Of these seventy-five per cent indicated that they would prefer to live on the campus if modern housing at sufficiently reasonable rates could be provided.

The time seems particularly ripe for domitory construction, Dr. Davis said, because "we are trying to cope with the largest freshman class in fifteen years and because this year for the first time since the demobilization surge of students into American colleges about 1920 Castle Stevens has proved inadequate for the accommodation of those who wished to live on the campus and had to be supplemented by the conversion of an older building to temporary dormitory use."

Dormitories to be Centers of College Life

The two dormitories to be erected now will accommodate approximately one hundred students. There will also be built into at least one of these, Dr. Davis said, certain much needed facilities for social life and recreation.

The plan of the college discussed by President Davis reserves the northern part of the campus, everything north of the present athletic fields, for student and faculty housing. Several faculty apartments are at present placed at that end of the campus.

TUO Defeats ATO In Bowling Finals, Winning Cup

The last bowling match of the season was held on Thursday afternoon, April 22nd, when the tie between A. T. O. and T. U. O. for first place was removed. The first string proved to be a thrilling one, T. U. O. edging their rivals by one pin. In the second they increased their lead to twenty-two pins, with bowling of a better calibre. The last ten boxes assured the "sport" house of a victory when their total overshadowing reached thirty-eight pins.

Both fraternities were off form considerably, probably because of the fact that there has been no match for three weeks. The last string showed an improvement, and both teams totaled about the 300 mark. Lambert of T. U. O. rang up the high for the afternoon with a score of 116. Final score, *T. U. O.—4*; *A. T. O.—0*.

Iota Alpha

Pennsylvania State College

Iota Alpha Chapter is at present having one of the most successful years in its history. We have at present eighteen members and three pledges. These men we expect to initiate before the end of the school year. The house is operating at full capacity.

Thus far this year we have pledged seven men, Jack Jones, Albert Kahn, Alden Owen, Roland Seely, Robert Seybert, Harold Wolf, Howard Wodock. Jack Jones was the undefeated 115 pound boxer of the freshman boxing squad, Albert Kahn is out for the fencing team, and Alden Owen and Robert Seybert are in the freshman band.

Last year we were fifth in the race for the scholarship cup, competing with fifty-five fraternities. This was a great help in our rushing last fall.

Last fall we put over a successful House Party week-end and we will do the same this spring. Our fall House Party was put on in conjunction with the Beta Kappa House. However we propose to carry out our Spring House Party plans purely as a T. U. O. affair. Another very successful social affair was the T. U. O. Dance at the Berwick Country Club during the Christmas vacation.

We are refinishing our basement to increase our clubroom space. So far we have been successful in completing our ping-pong room. Further plans include a card room and a lounge room. Most of the work is being done

by members of the chapter, with a little outside help. We hope to have it completed by the end of the present term.

We were fortunate in being represented at the convocation by numerous alumni, as well as active chapter members. All took active part in the business of the convocation.

The out-going class this year includes five members; Kenneth Houck, Robert Kuhl, Kenneth Miller, Howell (Rocks) Jobbins, and Richard Shoemaker. Aside from this we have Philip Patterson who will continue his veterinary study at the University of Pennsylvania. Their place in the house will be very difficult to fill.

The new chapter officers are: master, Willard Browning, '38; marshal, Howard Wodock, '40; scribe, James McCarthy, '39; recorder, A. Benson Creveling, Jr. '39; chaplain, Brookes Ringlaben, '39; herald, John Siegfried, '39; inner guard, Harold Wolf, '40; and outer guard, Albert Kahn, '40.

Delta Beta
Muhlenberg College

A dozen of the members and pledges gave up a good part of their vacations this year to paint the interior of the house. All of the bathrooms and vestibules were repainted on both wall and ceilings.

The number of members and pledges is increasing each semester. Christ Merayeas, Bernard Naef, Robert Trimble, and Richard Campbell were pledged the first semester and Gerald Guth the second semester. We are proud of this accomplishment since at Muhlenberg only 26 out of 461 boys pledged to the six fraternities.

A group of brothers from Delta Beta attended the Penn State-Muhlenberg football game last fall and were showered with hospitality from Iota Alpha chapter. They reported a grand week-end.

On March 13 Delta Beta chapter celebrated the ninth anniversary of the founding of the chapter. Thirty active and associate members attended the banquet. This was followed by the administration of the final initiation degree to Bernard Naef and Christ Merayeas.

Under the chairmanship of Herman E. Doepper, preparations are being made for the annual highlight of Delta Beta's social activities, the Spring Formal, to be held this year at South Mountain Manor, Wernersville, Pennsylvania.

Gamma Beta
University of California

Intramural Sports

Spring intramural sports are in full swing at the University. Gamma Beta is doing its best to gain a ranking in the interfraternity competition by putting out teams for every sport.

The tennis team is greatly handicapped this year by the loss of Jack Keck who helped give us a championship team last year. Master George Devine has being playing very good tennis and so far we have suffered but one defeat. We still have a chance to retain the tennis plaque won last year.

Softball baseball is the sport most in the limelight at present. The back bone of our team is Snyder, Sternetta, Kennett and Tonini. These boys have had much high school baseball experience and have shown their ability to "clout them out". To date our team is undefeated.

Things did not go so well for Gamma Beta in the basketball league after we lost the services of Walter Bickerton our high scorer and best player. "Bick"

left us to play on the first string freshman team.

The intramural program at U. C. is good enough to rank with any in the country. It is improving at a great rate with new sports being added every semester. All organizations and even boarding houses are included in its scope. This type of competition fosters good feeling among the houses and helps to unify the individual fraternities.

Social Highlights

Gamma Beta worked itself into pre-game spirits at its annual "Big Game" dance on the Friday proceeding the Cal-Stanford football fracas. The theme of the dance was woven around the "Stanford Jonah." This, according to an old legend, is a jinx Cal has on Stanford. The central decorative article was a huge plaster figure of a man seated on a throne, holding on his knees a massive crucible out of which moulten metal (in neon) fell to his feet. The figure was formerly used on a float designed by George Devine '37 for the parade opening the Bay Bridge. With a few appropriate changes the figure was placed in front of the chapter house. The caption "pour it on Jonah" was placed in front of it.

The dance was a complete success with a fine orchestra, and to top it off Cal won the next day 20 to 0.

For the first time in many years Gamma Beta has held an alumni banquet. It was arranged through the efforts of Chuck Mulks, alumni President, and was held at the Music Box in San Francisco. There was an exceptionally large turnout of alumni even from as far back as '15. In these days Gamma Beta was called the Tilicum Club. Many happy reunions among alumni and active members alike.

The monotony of studies is occasionally interrupted by informal radio dances at the house. A pledge dance at the beginning of the semester was given in the honor of seven new pledges, all of which have bright prospects in the University, either athletically or scholastically.

Personal Mention

Delta Beta

William Griffin, chapter master, is secretary of the Student Body at Muhlenberg. He is very active on the campus, being, in addition, a member of O. D. K., national activity fraternity, M. C. A. cabinet, and the Student Council.

Delta Beta is well represented on the *Muhlenberg Weekly* staff by Herman Doepper on the business staff and Mark Frantz. Bernard Naef and Richard Campbell are cub reporters.

Mark Frantz and Theodore Schiefele are on the debating team with Bernard Naef coming up as a freshman debater.

Howard Goheen has been chosen to play one of the leading roles in the spring production of the "Mask and Dagger" dramatic club. Mark Frantz was chosen chairman of the advertising committee for this production.

Philip Nelson is a member of Kappa Phi Kappa national educational fraternity. He is also a member of the Interfraternity Council and of the Deutsche Verein.

Christ Merayeas, Theodore Schiefele, and pledge Robert Trimble sing on the Muhlenberg College Choir.

M. Jay Mylymuk and Howard Goheen are holding down the cheerleading positions for all of the athletic games played at home.

Francis T. Knauss has played varsity basketball and varsity tennis for the past three years.

Gamma Beta

The most outstanding athlete at Gamma Beta at present is sophomore Dave deVerona. Dave made a name for himself on the coast last semester by playing first string varsity football. Dave, who is a left tackle, played in all of the games and did very well although he was hampered by a bad ankle in the "big game" against Stanford. Dave at present is rowing in the first crew boat. He has been chosen on the team to oppose Washington, April 17.

Jack Yates, now an alumnus of the house, has been given a job as assistant crew coach. Jack has gained much fame by rowing on two championship Poughkeepsie crews.

Bill Yates is following in his big brother Jack's footsteps. Although he is only a sophomore, Bill is alternating between the second and third boats, and has aspirations for a berth on the varsity.

Another crewman at Gamma Beta is freshman Bernard Shulte. "Barney" was pretty sure of his position in the first frosh boat but for an unfortunate accident. He tripped while going down stairs and suffered a fractured arm.

Walter Bickerton, pledge at Gamma Beta, has made freshman numerals in both football and basketball. Not being content with these he has turned out for baseball and is holding down the position at third base.

Gordon Ferran, also a freshman, has made numerals in both football and rugby.

Bernard Taylor earned a circle "C" by playing on the soccer team.

Stanley Lachman earned a letter by playing on the freshman golf team last year and is now playing six man on the varsity.
